- Elections next meeting 03/24
- University Engagement Recognition awards
 - Ben Lewis (contact person)- Deadline is March 8th
 - Excellence in Community Service with cash awards (\$20,000 in total)
- HSIPE (Health Sciences Inter-Professional Education Director) interviews next week
 - Sitting in on interviews Wednesday and Friday
 - 2 candidates with Pharmacy backgrounds
 - Everyone (minus College of Law) has been involved in iPEP seminars
 - Any questions to discuss in the meeting:
 - Not a requirement for Vet Med, but want to create a student liaison (ask how Vet Med could play a role?)
 - How will they interact with student groups?
 - How can law be integrated more in interprofessional education?

- Concerns that since these events are health focused, they might not be very applicable to law
 - Making IPS a 4-credit course?
 - How they plan on breaking past stereotypes?
 - No continuity in inter-professional events - how are they going to build on each event that they host?

IV. Secretary Update: Candice Park

VI. Chief Justice Update: Virgil Vulvara

- PDF Spring window now closed - big thanks to everyone who helped with promotion!
- Discussion with Teresa and Kerry about required PDF changes
 - Prospective funding, more merit-based
 - How do we distinguish between a good and bad applicant?
 - Colleges should grade their own applicants
 - How is it evaluated now?
 - More weight given to the essay
 - Make a rubric with some general criteria + school specific criteria
 - \$5,000 from each Dean (specified just for that college)
 - Other funding divided equally between the colleges → higher % towards schools with more applicants?
 - Idea to wait until the rubrics are determined before making any changes to how money is allocated - then we can know what the ACTUAL needs are
 - Demonstration of financial need?/Disclosure of if any students are receiving any other scholarships
- Kerry Discussion
 - Costs ~\$150 to cut a check (due to all of the compliance, people that have to pass through the money, verifications, etc)
 - Need to be efficient and utilize IPC resources appropriately
 - \$15,000 from Office of Academic Affairs to fund PDF (not requirement to equally distribute among colleges)
 - Legitimate idea to allocate more \$ to colleges that demonstrate more need
 - Possible to go back to OAA in future years and ask for more money
 - Can also go back to the Deans of each school to ask for more \$ for their respective school
 - Wants to move to a prospective process
 - Adding question to application: "How would receiving this funding impact you?"

- In the current status and future changed status, you would still need back-up documentation (receipts, abstract acceptance letter, audit form, etc) just at a different time
